1. INTRODUCTION

1.1 DOCUMENT PURPOSE

EU and non-EU companies who are accredited entities for CBAM reasons by EU Member States National Accreditation Bodies (NABs) and would like to become Registered CBAM Accredited Verifiers, must have access to the CBAM Third Country Operator Portal to register and report information about their company and their accreditation scopes.

Therefore, the purpose of this document is to provide the access request steps that should be followed by EU or non-EU Companies to get access to the CBAM Third Country Operators portal (CBAM O3CI portal) and also how to apply in the portal towards the NCAs to become Registered CBAM Accredited Verifier.

After the access request is approved, the Accredited CBAM Verifier will be able to access the CBAM Third Country Operator Portal, where he should perform additional steps to apply and become a registered CBAM Accredited Verifier and review the monitoring approach, emissions calculations and supporting evidence. These steps are described on the CBAM Registry – User manual for the O3CI Portal, available on the CBAM Registry website.

The specific portal to be used by the Accredited Entities for the management of their registration requests is the CBAM Registry – O3CI Portal – available at the website address: https://cbam.ec.europa.eu/o3cinstallation.

1.2 DISCLAIMER

Please, note that EU access is a first step, to request the technical user access. This step is a prerequisite to request access to the CBAM registry.

The second step is for your business request for registration as a Registered Verifier in the CBAM registry. This step will be managed by the National Competent Authority of the country of accreditation.

1.3 TARGET AUDIENCE

The target audience for this document includes:

- European Commission;
- CBAM National Competent Authorities (NCAs)
- Accredited Verifiers.

1.4 STRUCTURE

This document is organised as follows:

Chapter 1 – Introduction: describes the scope and the objectives of the document;

Chapter 2 – Business Guidance on the CBAM processes: describes the general guidance on the legal acts governing the CBAM domain, as well as guidance on the main processes and how to add data about the companies.

Chapter 3 - Step-by-step guidance for gaining access to O3CI Portal as Accredited Verifier: defines the guidelines and step-by-step procedure for granting access to the CBAM Registry.

Chapter 4 – User Responsibilities and Security Requirements: presents the user responsibilities and security requirements when using the IT system related to the management of access requests for the CBAM portal.

Chapter 5 – Helpdesk and user access management support: presents the helpdesk contact points that the verifier from the third countries may use in order to get support on the access management requests.

Chapter 6 – Further Guidance on the use of the O3CI Portal to manage your registration: defines the guidelines on how to consult the user manual for the CBAM Accredited Verifiers portal in order to apply to become a registered CBAM Accredited Verifiers.

1.5 REFERENCE DOCUMENTS

The table below lists the documents that are referred to in the current document.

Ref.	Title	Originator	Version	Date
R01	General Data Protection Regulation	REGULATION (EU) 2016/679 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC	-	27/04/2016
R02	Internal Data Protection Regulation	REGULATION (EU) 2018/1725 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 23 October 2018 on the protection of natural persons with regard to the processing of personal data by the Union institutions, bodies, offices and agencies and on the free movement of such data, and repealing Regulation (EC) No 45/2001 and Decision No 1247/2002/EC	-	23/10/2018
R03	CBAM Regulation	Regulation (EU) 2023/956 of the European Parliament and of the Council of 10 May 2023 establishing a carbon border adjustment mechanism	-	10/05/2023

1.6 APPLICABLE DOCUMENTS

The table below lists the documents to which the current document must be compliant .

Ref.	Title	Originator	Version	Date
A01	CBAM Regulation	Regulation (EU) 2023/956 of the European Parliament and of the Council of 10 May 2023 establishing a carbon border adjustment mechanism	-	10/05/2023

Table 2: Applicable documents

1.7 ABBREVIATIONS & ACRONYMS

For a better understanding of the present document, the following table provides a list of the principal abbreviations and acronyms used.

Abbreviation/ Acronym	Meaning
ACEO	Accredited Entity
ACEEMPL	Employee of an Accredited Entity
CBAM	Carbon Border Adjustment Mechanism
CBAM O3CI	CBAM Third Country Operators Portal
DG TAXUD	Directorate General for Taxation and Customs Union
EU	European Union
EC	European Commission
GDPR	General Data Protection Regulation
IDPR	Internal Data Protection Regulation
O3CI	Operators of Third Countries Installations
TCEMPL	Third Country Operator Employee
TCO	Third Country Operator
UAM	User Access Management
MFA	Multi Factor Authentication

Table 3: Abbreviations and acronyms

1.8 DEFINITIONS

Term	Meaning
Operators of 3rd Countries Installations	Installation operators in 3rd countries are the persons who operate or control an installation in a 3rd country.
Access Request Validator	An EC Official with the authority to approve or deny access to the CBAM Operators Portal for O3CIs from a business perspective.
EU Login	European Union user authentication service.
EU Access	EU Access serves as the infrastructure-layer authorisation solution for the O3CI portal.
Admin Operator	Third Country Operator – Administrator role (able to submit requests to the EU Commission)
Simple Operator	Third Country Operator – Simple user (able to prepare requests only)
Accredited Entity	Accredited Entity is an independent third-party auditor, that is accredited by NABs (National Accreditation Bodies from the EU).

Table 4: Definitions

2. BUSINESS GUIDANCE ON THE CBAM PROCESSES

2.1 INTRODUCTION

To ensure compliance with the CBAM Regulation, the **Accredited Entities and Third Country Operators Portal** (CBAM O3CI) section of the CBAM Registry has been established. This portal allows the verifiers:

- To apply to the EU National Competent Authorities (NCAs) to become a Registered CBAM Accredited Verifier;
- To start a collaboration request between the Registered Accredited Verifier and the Registered Operator of Third Country Installations;
- To verify operator's emissions report calculation and to issue the verification report, corresponding to yearly emissions for that installation.

Implementation in the CBAM Registry of the CBAM verification in third country installation was done based on the following legislative acts:

- Commission Implementing Regulation (EU) 2025/2546 - on the application of verification principles;
- Commission Delegated Regulation (EU) 2025/2551 - on accreditation and verification;
- Commission Implementing Regulation (EU) 2025/2547 - on methods for the calculation of emissions embedded in goods.

Please note that **Article 14(4) of the CBAM Regulation** addresses confidentiality, specifying that the CBAM registry data under Article 10(2) shall remain confidential. However, names, addresses, and contact information of operators and the locations of installations in third countries may be made public. Operators have however the option to withhold their names, addresses, and contact information from public access.

2.2 REQUIRED DOCUMENTS TO BE SUBMITTED BY THE ACCREDITED VERIFIERS FOR THE ACCESS REQUEST

When submitting the request for access as an Accredited Entity (Accredited Verifier) to the CBAM - EU Access system to request access, please prepare and submit the following business types of documents:

- **Accreditation Certificate**: Demonstrates that the accredited entity applied to be an accredited verifier and that the NAB provided it with this document and includes essential details (name, address, contact information, and tax ID or equivalent).
- **Company registration documentation:** Demonstrates that the company that will be accredited as verifier provided the legally relevant documentation that identifies the company as a registered legal entity in the country of origin.
- **Identity document of the person acting on behalf of the accredited entity**: Identity document of the representative, like national identity card or passport.

To send the 3 types of documents at once in the system, please **merge the documents into one single pdf file** and upload the pdf file in the request for access from the EU Access system (as detailed in chapter 3.3.7 - EU Access on-boarding – step 5 – last step, on page 25).

It is strongly recommended to upload supporting documents in **English language**. Supporting documents which are not in English language may result in delays in the accredited entity's access request processing.

2.3 GUIDANCE FOR KEY ACCREDITED ENTITY IDENTIFIERS

- **Accredited Entity Identifier – Accredited Entity ID/Corporate Registration Number (CRN)**: Accredited Entity Identifier represents the corporate registration number. This is a unique identifier assigned to a business entity upon its official registration with a national or regional business registry. This number serves as proof of a company's legal existence and is used for identification and record-keeping purposes by government agencies, financial institutions, and regulatory authorities. The format of this identifier varies by country, often consisting of a series of numbers, letters, or a combination that uniquely identifies the business. The company identifier should start with the 2-letter country code for the country where the company is registered. The maximum length of this identifier is 25 characters.
- Please note that the Accredited Entities located in a country of the European Union may declare either their Tax identification number or their Corporate Registration number at the Registry of Commerce in the Member State in this field.

  Example identifiers (not to be used in your request):

  - BEABCD12345 (BE for the 2-letter country-code for Belgium, followed by some letters and numbers)
  - IN123456ABCD (IN for the 2-letter country-code for India, followed by some letters and numbers)
  - BR.XYZ-1234567890 (BR for the 2-letter country-code for Brazil, followed by a separator (dot), followed by other characters.

We recommend using the following identifiers for the countries listed below:

- **For China:** Unified Social Credit (USC) number
- **For India:** Corporate Identification Number (CIN) or Limited Liability Partnership Identification Number (LLPIN)
- **For the United Kingdom:** Company Registration Number (CRN)
- **For the United States:** Central Index Key (CIK)
- **For South Korea:** Business registration number (TIN)
- **For Türkiye:** Vergi Kimlik Numarası
- **For Ukraine:** Registration number (EDRPOU)
- **For others:** Business or trade register number, tax identification number, or Legal Entity Identifier (LEI)

Example for the company identifier in the request for access from the EU Access system:

Figure 1: Example of company identifier added in the CBAM access request

3. STEP-BY-STEP GUIDANCE FOR GAINING ACCESS TO O3CI PORTAL AS ACCREDITED VERIFIER

3.1 TYPES OF ACTORS

With regards to O3CI Portal users, there are four types of actors that can gain access to the O3CI Portal. Table 5 presents the four types of actors:

Type of Actor	Role
Third Country Operator (TCO)	This refers to the legal entity. It can be the CEO/legal representative for the operator who applies for access to the O3CI portal.
Third Country Operator Employee (TCEMPL)	This refers to a natural person (employee) who receives a delegation by the TCO to access the O3CI portal.
Accredited Entity (ACEO)	This refers to the legal entity. Accredited verifier is an independent third-party auditor, accredited by a NABs (National Accreditation Bodies from the EU).
Employee of accredited entity (ACEEMPL)	This refers to a natural person (employee) who receives a delegation by the ACEO to access the O3CI portal. Permissions are the same as for the main actor ACEO.

Table 5: O3CI Types of Actors

The Accredited Entity is the legal entity that initially requests access to the O3CI portal. A high-level view of this process is depicted below:

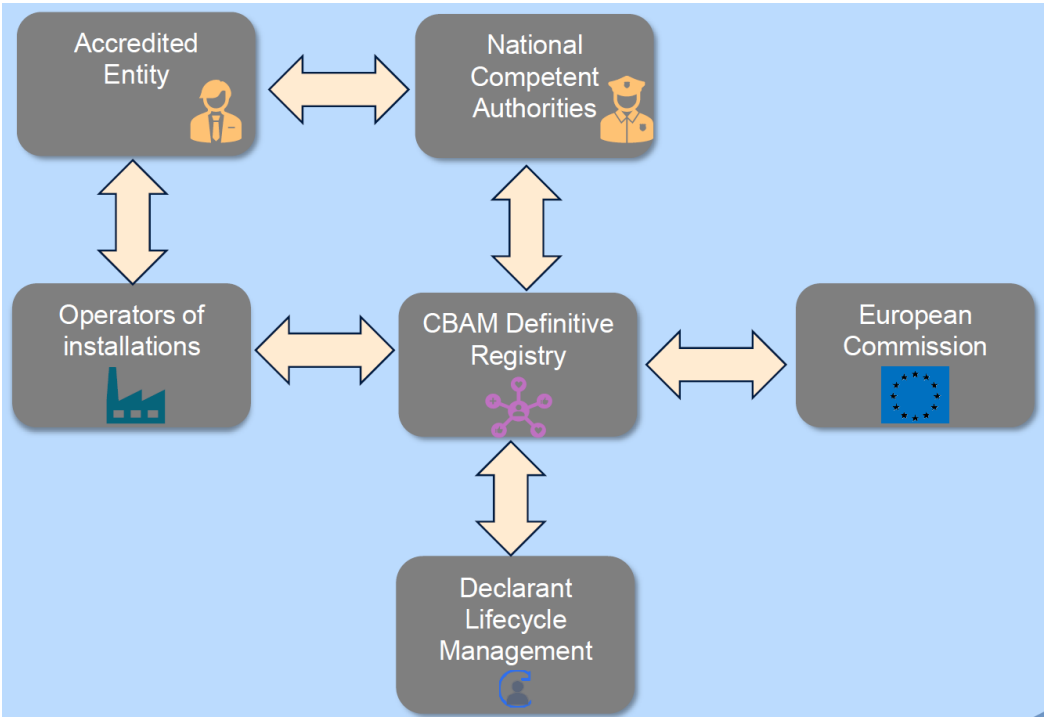

Figure 2: O3CI types of actors, roles and relationship

Accredited Entity can gain access to the CBAM Definitive Registry and then apply to become Regitered Verifier to the National Competent Authority (NCA) of the country where they have been accredited by a National Accreditation Body (NAB).

Once the Accredited Verifier is a Registered verifier, then they may start a collaboration request – through the CBAM Registry – with the Operators of Third Country Installations. Aim of this collaboration is for the Operators to communicate to the Accredited Verifier the emissions report and for the Verifier to produce the Verification Report in the CBAM Registry.

Once the Verification Report is produced, then the Operator of Third Country Installation may share the verified emissions information through the CBAM Registry with the importer in the EU who is authorised CBAM declarant.

As a final step, the EU Authorised CBAM declarant, in the CBAM Registry – Declaration Lifecycle Management module – will lodge their yearly CBAM Declaration using verified actual emissions shared by the Operator from the Verification Report.

3.2 EU LOGIN ACCOUNT CREATION

A pre-requisite for ACEO to request access to the O3CI Portal is the creation of an EU Login account.

EU Login is the entry gate to sign in to different European Commission services and/or other systems. EU Login verifies your identity and allows recovering your personal settings, history and access rights in a secure way.

For guidelines on how to create an EU Login account, please refer to the relevant EU Login frequently-asked-questions (FAQs).

Please note that to authenticate in EU Login a 2-factor authentication is required, so this needs to be appropriately setup. Please consult the EU Login tutorial in order to select the preferred authentication method among the options below:

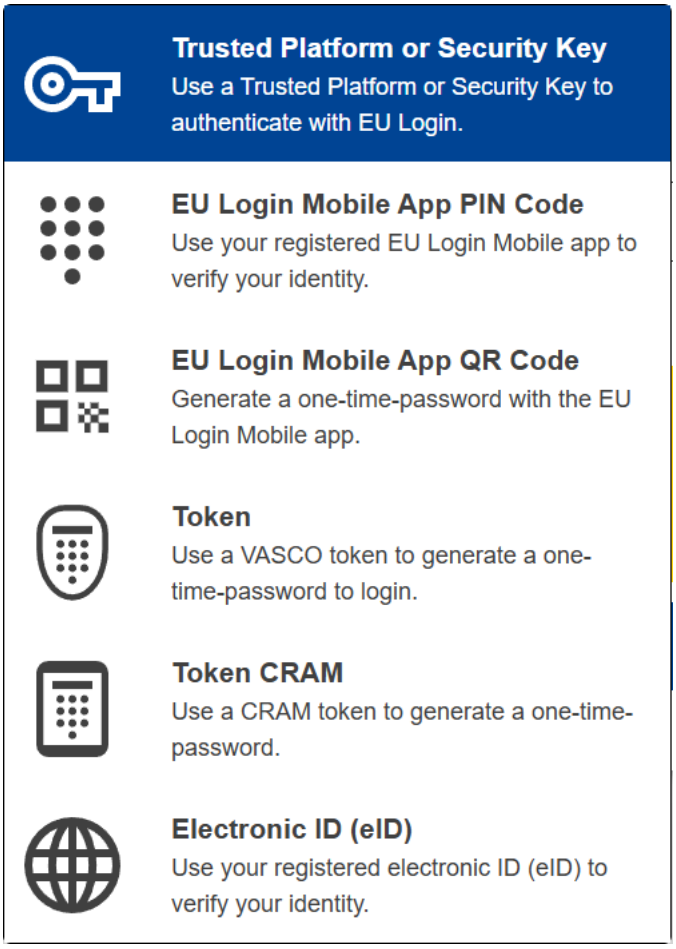

Figure 3: EU Login authentication methods

Depending on the country, the availability of authentication methods may vary.

For the CBAM O3CI Portal, the recommended 2-factor authentication methods are any of the following:

- EU Login Mobile App PIN Code;
- EU Login Mobile App QR Code;
- Security Key or Trusted Platform.

Please note that in some countries the Google or Apple stores/services might not be available, thus the EU Login Mobile App is not available. In these cases, to authenticate you need to register your Security Key or Trusted Platform. The only requirement for the security key is to be FIDO2 certified (e.g. Yubikey).

You will be able to register a Security Key/Trusted Platform following the EU Login tutorial on this matter, which also includes a video tutorial with the necessary steps.

3.3 REQUEST ACCESS TO CBAM REGISTRY THROUGH THE EU ACCESS

To request access to the CBAM Registry – Accredited Entities and Operators of Third Countries Installations portal, please follow the instructions in this chapter.

3.3.1 Authenticate in EU Login

Once the ACEO has successfully created an EU Login account (as outlined in section 3.2), the ACEO can proceed with submitting a request for access to the O3CI Portal through EU Access by following the steps listed below.

Click on the following link: https://cbam.ec.europa.eu/o3cinstallation to access CBAM Registry - O3CI Portal.

You will be redirected to the EU Login system, to be authenticated.

Please add your email address that you have used in the section 3.2 in the indicated field and click on "Next".

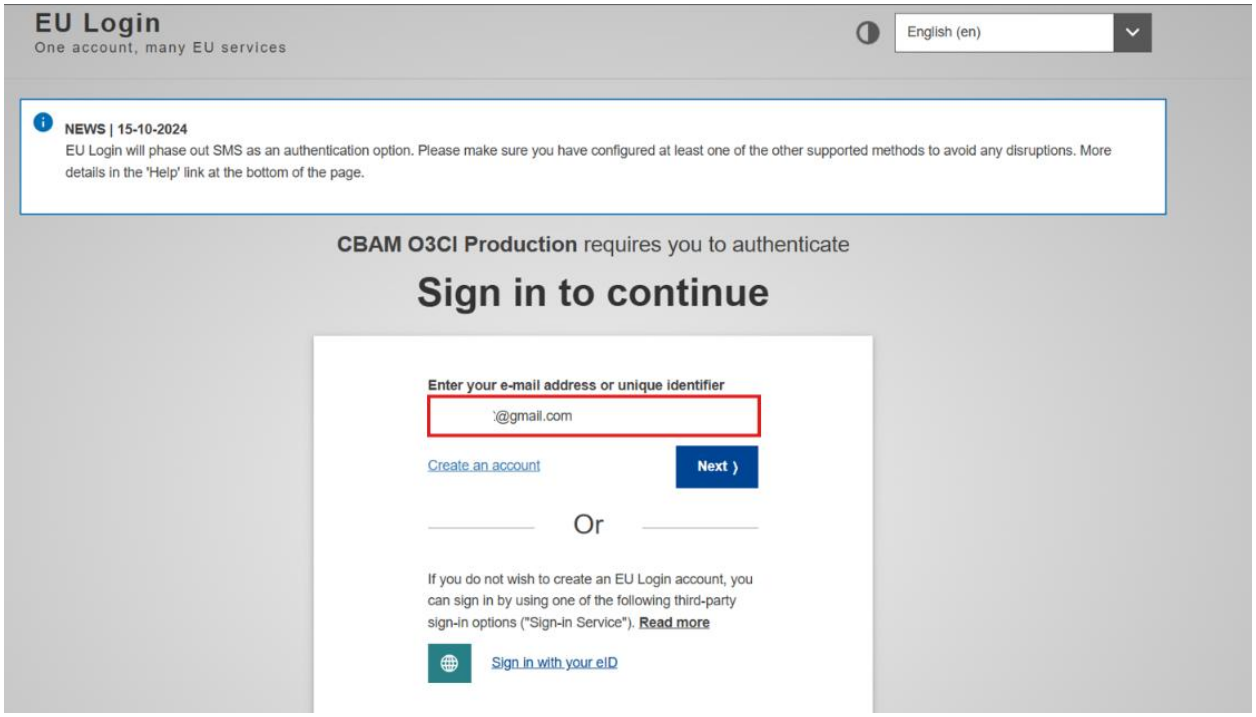

Figure 4: CBAM Registry authentication through EU Login (e-mail)

Enter your password (the same password used when creating your EU Login account) in the indicated field as displayed below, select the verification method of choice and click on "sign in". For this example, we have selected the "EU Login Mobile App PIN code" as the authentication method.

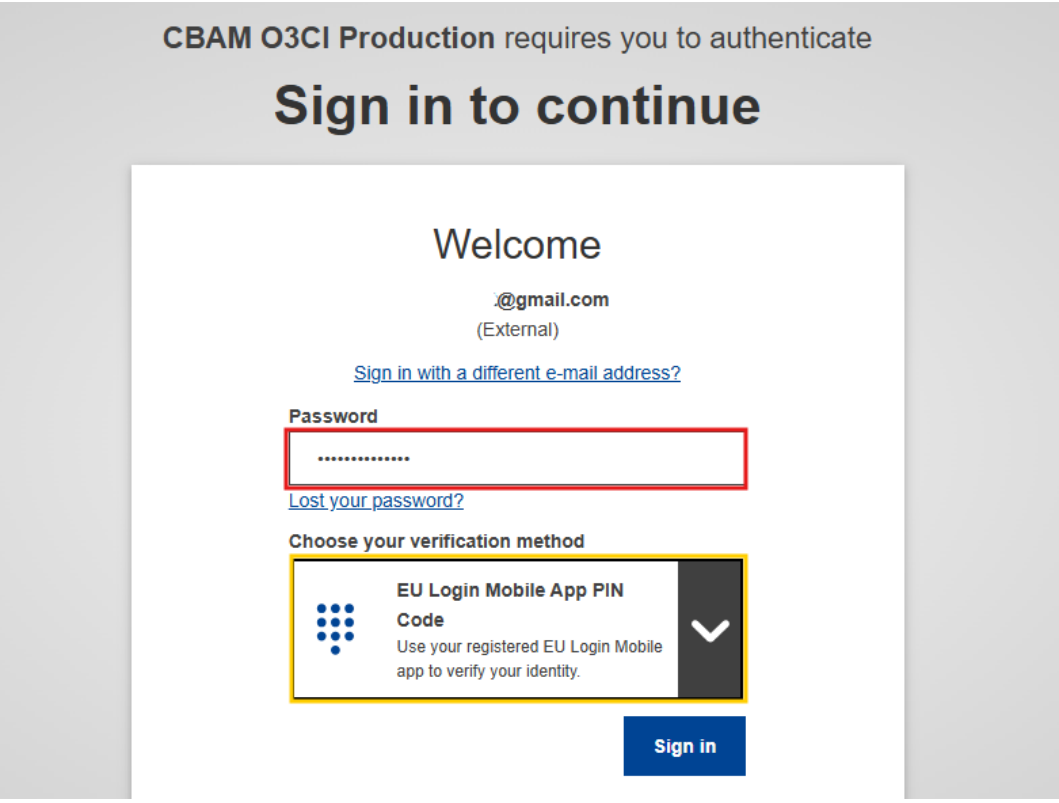

Figure 5: CBAM Registry authentication through EU Login (password and verification method)

3.3.2 Request an EU Access profile

After clicking "Sign in" to be authenticated and authorised by the EU Login system (using EU Login mobile app PIN code or other verification method), you will receive a message indicating that "No EU Access identity profile" is found. Click on "**Request an EU Access profile**" as displayed below:

Figure 6: Request an EU Access profile

3.3.3 EU Access on-boarding – step 1

You will then be redirected to the first step of EU Access Onboarding wizard, where you will be prompted to select the Application Subdomain details and then click on the "Next" button, as indicated below:

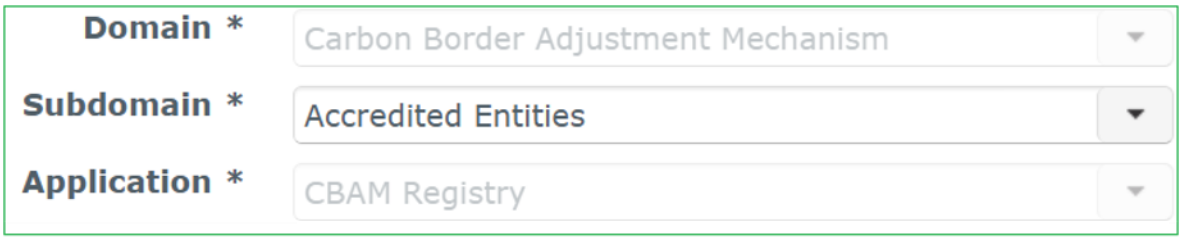

Figure 7: EU Access Onboarding Wizard – Step 2 - Enter the Application Subdomain details & click "Next" button

Field No.	Field Name	Field Description
1	Domain	Entry "*Carbon Border Adjustment Mechanism*" is automatically selected
2	Subdomain	Select "*Accredited Entities*" from the dropdown
3	Application	Entry "*CBAM Registry*" is automatically selected

Table 6: Application Domain Details

3.3.4 EU Access on-boarding – step 2

You will then be redirected to the second step of the EU Access Onboarding wizard, where you will be prompted to enter the company details and then click on the "Next" button, as indicated below:

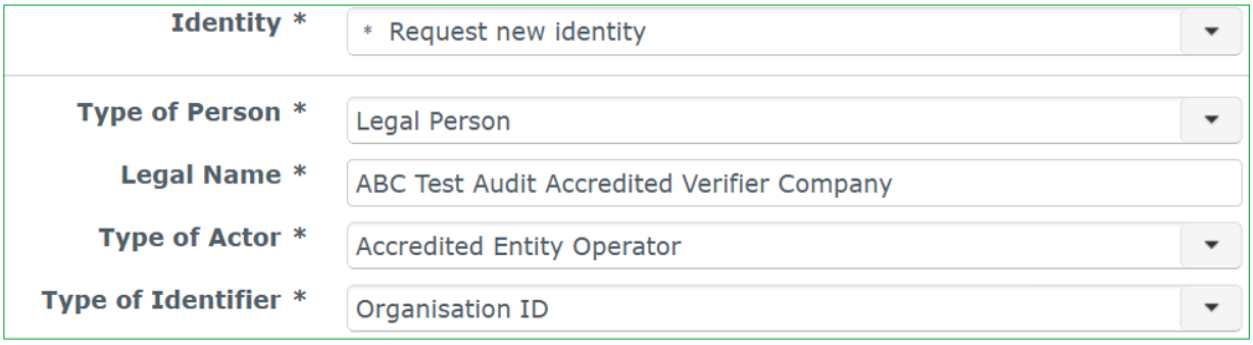

Figure 8: EU Access Onboarding Wizard – Step 2 - Enter the company details & click "Next" button

Field No.	Field Name	Field Description
1	Identity	Retain default selection "*Request new identity*"
2	Type of Person	As a legal entity requesting access, select "*Legal Person*" from the dropdown
3	Legal Name	Enter the legal name of the Accredited Entity. Name of the company should not exceed 70 characters. Please use the internationalized transliterated name of your company.
4	Type of Actor	As a legal entity requesting access, select "*Accredited Entity Operator*"
5	Type of Identifier	Keep the default selection "*Organisation ID*", which represents the corporate registration number of your company.

Table 7: Accredited Verifier Company Details

3.3.5 EU Access on-boarding – step 3

At this point, you will be directed to the third step of the onboarding wizard, where you will be asked to choose the assignable profiles. Make sure to select both assignable profiles Accredited Entity – Admin User and Accredited Entity – Simple User and then click on the "Next" button, as shown below.

Please be aware that Accredited Entity – Admin User supersedes Accredited Entity – Simple User, and this later assignable profile is required to be selected only for the option to delegate rights in O3CI Portal to an Employee of the Accredited Entity.

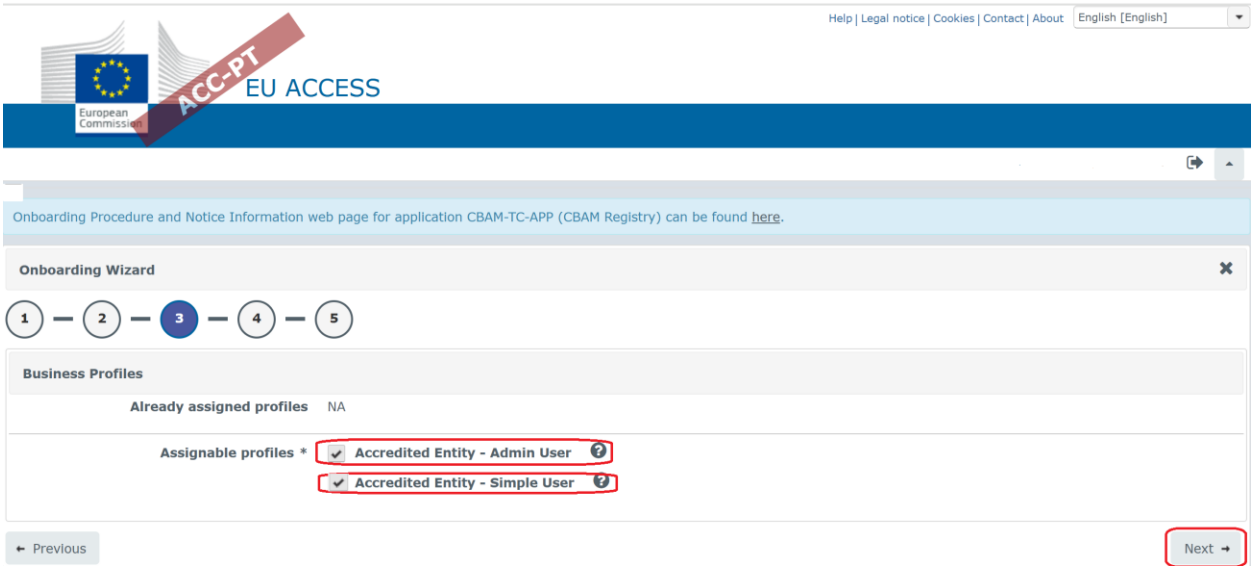

Figure 9: EU Access Onboarding Wizard – Step 3 - Business Profiles

Business Profile Name	Business Profile Description
Accredited Entity - Admin User	Allows the ACEO to access the O3CI Portal and submit requests to the European Commission (e.g., request to become an Accredited Entity, request for change, request for revocation etc).
Accredited Entity - Simple User	Only allows to save a registration request (e.g., fill in and save a request to become a registered Accredited Entity but not to submit this request to the NCA).

Table 8: Business Profiles

3.3.6 EU Access on-boarding – step 4

At this point, you will be directed to the fourth step of the onboarding wizard, where you will be prompted to add the company attribute values and then click on the "Next" button, as shown below.

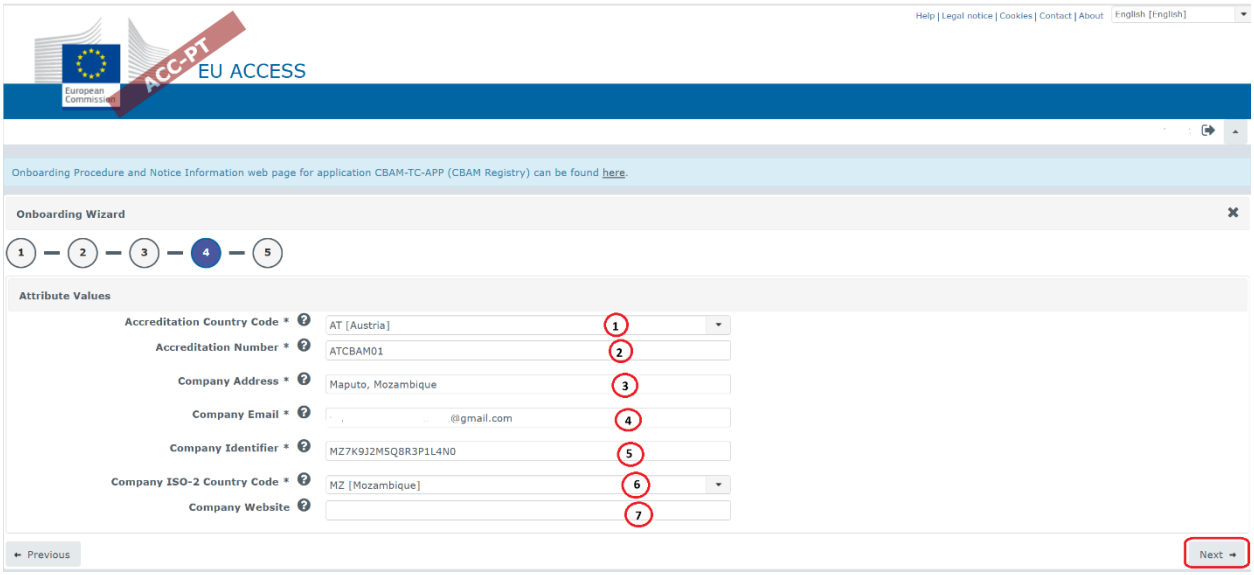

Figure 10: EU Access Onboarding Wizard – Step 4 - Company Details

Field No.	Field Name	Field Description
1	Accreditation Country code	This is a mandatory field. Select the ISO country code of the NAB that provided the Accreditation for the Verifier from the dropdown list.
2	Accreditation number	This is a mandatory field. Enter the accreditation number as provided by NAB.
3	Company Address	This is a mandatory field. Enter your Accredited Entity's physical address of the main office.
4	Company Email	This is a mandatory field. Enter your Accredited Entity email address.

Field No.	Field Name	Field Description
		The value entered in the "Company Email" attribute must adhere to the following rules: • The local part (before the "@" symbol) can contain letters (both uppercase and lowercase), numbers, periods (.), underscores (_), percentage signs (%), plus signs (+), and hyphens (-). • It must contain the "@" symbol, which separates the local part and the domain part of the email. • The domain part (after the "@") must be composed of letters, numbers, periods (.), and hyphens (-). • The domain part must be followed by a period (.). • The domain extension (after the period) must consist of at least two letters. Example of a valid email: • user.name@example.com Example of an invalid email: • user@com (Missing domain extension) • user@.com (Invalid domain format)
5	Company Identifier **(see chapter 2.3)**	This is a mandatory field. Accredited Entity Identifier represents the corporate registration number. This is a unique identifier assigned to a business entity upon its official registration with a national or regional business registry. This number serves as proof of a company's legal existence and is used for identification and record-keeping purposes by government agencies, financial institutions, and regulatory authorities. The format of this identifier varies by country, often consisting of a series of numbers, letters, or a combination that uniquely identifies the business. The identifier entered in the “Company Identifier” attribute must adhere to the following rules: • It must begin with the 2-letter country code (in uppercase) of the country where the company is incorporated. If your national corporate registration number does not start with the 2-letter country code, you must add it at the beginning when entering it in this field. For example, if your national corporate registration number is 12345 and the company is registered in a country with the country code "IN," you should enter IN12345 in this field. • The first 2-letter country code must match the country code selected in the “Company ISO-2 Country Code” dropdown below. For instance, if you entered IN12345 in the “Company Identifier” field, you must select the “IN [India]” option in the “Company ISO-2 Country Code” dropdown. If the codes do not match, the “Company Identifier” attribute will be considered invalid when you proceed to

Field No.	Field Name	Field Description
		the last step of the registration onboarding wizard, where these validations are performed, as explained further in step 0. • Maximum size is 25 characters. • It must contain only valid characters. The valid characters are as follows: ○ Any Latin letter in lowercase or uppercase (a-z, A-Z) ○ Any digit (0-9) ○ Dot (.) ○ Dash (-) • Examples of type of company identifiers: ○ For companies located in the Member States of the European Union: VAT number or Tax identification number or Corporate Registration number at the Registry of Commerce/Ministry of Finances in the Member State. ○ For China: Unified Social Credit (USC) number. ○ For India: Corporate Identification Number (CIN) or Limited Liability Partnership Identification Number (LLPIN). ○ For the United Kingdom: Company Registration Number (CRN). ○ For the United States: Central Index Key (CIK). ○ For South Korea: Business registration number (TIN). ○ For Türkiye: Vergi Kimlik Numarasi. ○ For Ukraine: Registration number (EDRPOU). ○ For others: Business or trader register number, tax identification number or Legal Entity Identifier (LEI). For a complete list of identifiers per countries of the world, please consult the European Central Bank statistical data reporting and standards, List of National Identifiers.
6	Company ISO-2 Country Code	This is a mandatory field. Select from the dropdown the 2-letter code of the country where your company is based. The user can type the country name within the dropdown lookup (as shown in the screenshot below) to quickly locate and select it. 

Field No.	Field Name	Field Description
		Examples: • BE [Belgium] • DE [Germany] • FR [France] • ES [Spain] • RO [Romania] • PL [Poland] • CA [Canada] • GB [United Kingdom] • TR [Turkiye] • UA [Ukraine] • US [United States]
7	Company Website	This is an optional field, but it is highly recommended to provide it, as doing so will speed up the validation of your access request. Enter your company's website address. The value entered in the "Company Website" attribute must follow these rules: • It can start with www., http://www. or https://www. • The domain name is mandatory. It can include only letters, numbers and hyphen and it must be followed by a period. • After the domain, the top-level domain (TLD, example: .com or .cn or .in or .ca or .tr) is mandatory and must be between 2 and 6 letters long. • Optionally, the website address may end with a path or query parameters. If provided, it should start with a slash (/) and can include only letters, numbers, hash (#), and slash (/) characters. Examples: • https://www.example.com • http://example.com • www.example.com • example.com • https://example.com/path/to/resource

Table 9: Accredited Entity attribute details

3.3.7 EU Access on-boarding – step 5 – last step

At this stage, you will be taken to the final step of the onboarding wizard, where you will have the opportunity to:

- Review a summary of the details you have entered and make any necessary corrections, as outlined in the table below.
- Provide a justification for your registration request, as explained in the table below.
- Attach the mandatory justification documents to verify your company's identity.

For the required documents that the Accredited Entity is asked to upload as justification documents, please refer to chapter 2.2.

Once all the information is correct, submit your request by clicking the "Submit" button.

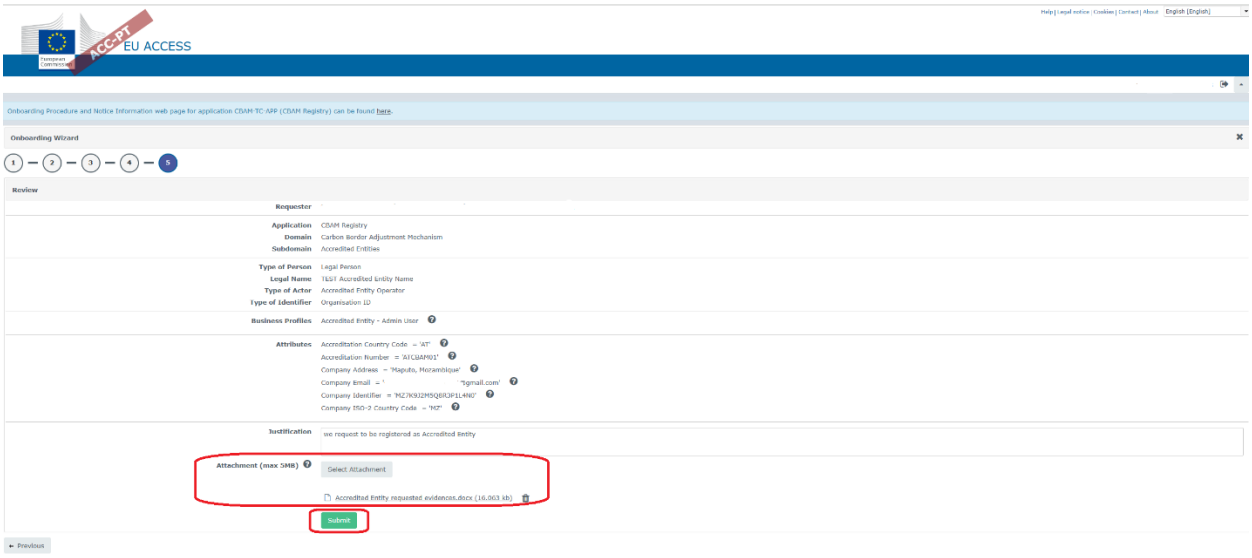

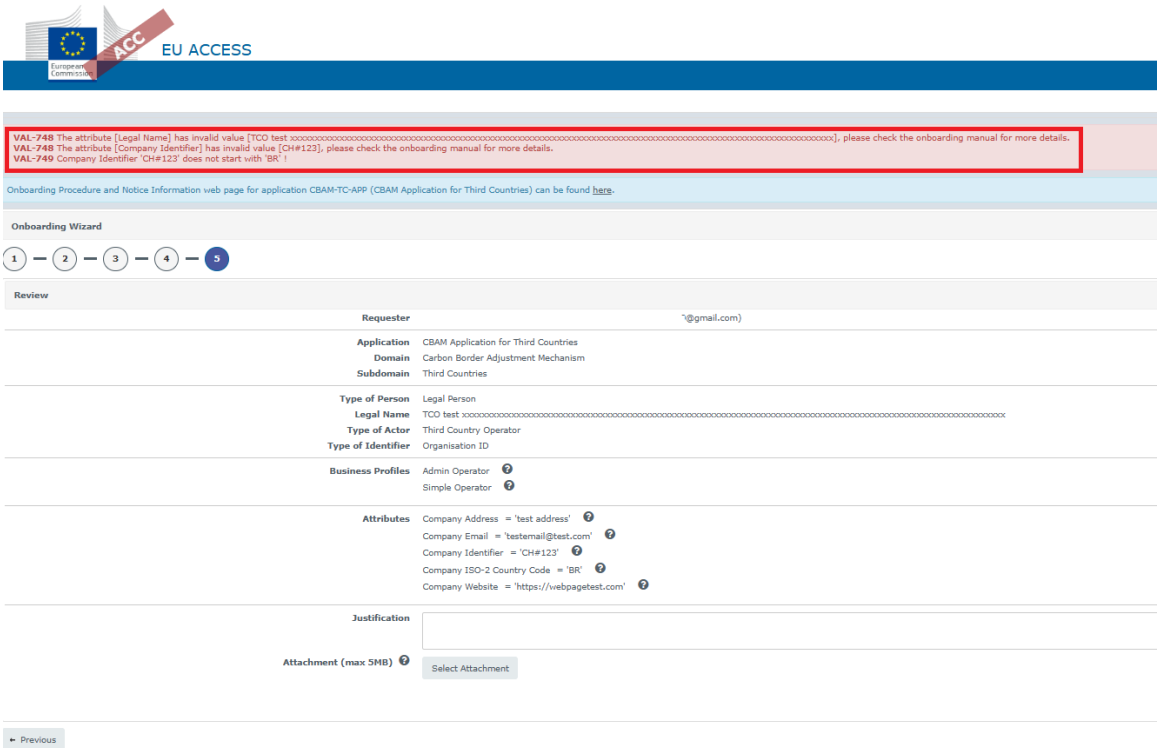

Figure 11: EU Access Onboarding Wizard – Step 5 – Upload attachment document

3.3.8 Validation error messages that could appear when filling-in request for technical access

While completing the request for technical access, some validation error messages may appear in the case that what you fill-in is not correct or not accurate according to the defined validation rule for the respective field.

In this chapter, you are shown how a validation error message appears on your screen and what does every message mean in practical terms.

VAL-748 The attribute [Legal Name] has invalid value [TCO test xxxx

Screen Element	Screen Element Description
	• VAL748 The attribute [Legal Name] has invalid value [xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx], please check the onboarding manual for more details. ○ This error occurs when the value entered in the "Legal Name" attribute (in step 2 of the wizard) violates the rule outlined in Table 7. ○ For example, in the screenshot above (Figure 12), this error appears twice because the value entered in the "Legal Name" field, "TCO Test xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx" exceeds the maximum allowed length of 70 characters. • VAL748 The attribute [Company Email] has invalid value [xxxxxx], please check the onboarding manual for more details. ○ This error occurs when the value entered in the "Company Email" attribute (in step 4 of the wizard) violates one or more of the rules outlined in Table 9. • VAL748 The attribute [Company Website] has invalid value [xxxxxx], please check the onboarding manual for more details. ○ This error occurs when the value entered in the "Company Website" attribute (in step 4 of the wizard) violates one or more of the rules outlined in Table 9. If there is at least one error, the user will not be able to submit the access request until data is corrected. To fix the issue, navigate to the previous step(s) (by clicking the "Previous" button) where the invalid field(s) were entered, correct the values, and then proceed back to the final step of the wizard.
Justification	This is an optional free text. If the ACEO administrator wishes to obtain the rights to delegate access to the O3CI portal to one or more employees, they should specify this request in this field, by entering the following text: "**We request the possibility for delegation to employee**".
Attachment	This is a mandatory field. Only one file can be submitted with the request, and it must not exceed 5 MB in size. **It is strongly advised to upload supporting documents exclusively in PDF format. To incorporate multiple business documents into a single technical file, please merge them into one PDF file.**
Submit	The "Submit" button will only become visible and enabled once all the data has been entered correctly (there are no validation errors) and the mandatory attachment has been added.

Table 10: Registration request – "Review" Step

3.3.9 EU Access on-boarding – confirmation emails related to your request

After submitting the registration request, you will receive an email confirming that your access request has been successfully created, as shown in the screenshot below.

```
From: <DIGIT-EUACCESS-NOREPLY@ec.europa.eu>
Date: Tue, 18 Aug 2026 at 15:31
Subject: Access request created
To: <Accredited Entity email address>

This email is part of an automatic notification process related to your EU-ACCESS request.

Your access request [cf89f704-dfba-4583-a74a-cfdec0ee3fdf] for application `CBAM Registry` (CBAM-TC-APP) has been successfully submitted.
One of the users managers will review your request and decide if your request is justified and can be approved.
You will receive notifications whenever the request will be processed.

 Below is a summary of the access request information:
 - Application: CBAM Registry
 - Domain: Carbon Border Adjustment Mechanism
 - Subdomain: Accredited Entities
 - Type of Person: Legal Person
 - Name: Belgium Audit company
 - Type of Actor: Accredited Entity Operator
 - Type of Identifier: OrganisationID
 - Identifier: BE.QWERTY-AB123-B01
 - Business Profiles:
    * Accredited Entity - Admin User

 - Attributes:
    * Accreditation Country Code = BE
    * Accreditation Number = BEACE01
    * Company Address = Rue Principale 10, Zaventem
    * Company Email = email address
    * Company Identifier = BE.QWERTY-AB123-B01
    * Company ISO-2 Country Code = BE
    * Company Website = http://www.belgium-cbam-test-audit-company.be

The data being collected is processed as detailed here: https://webgate.ec.europa.eu/cas/privacyStatement.html
```

Figure 13: EU Access Registration – O3CI Access Request Creation Notification

Once the access request was created, an administrator at the European Commission will review it, and you will be notified of its approval or rejection via email. Please be aware that this process may take several days after submission. The following scenarios are possible:

- If the access request is approved, you will receive an email notification as shown below. At this stage, you should be able to connect to the O3CI Portal, as described in chapter 6.

```
From: <DIGIT-EUACCESS-NOREPLY@ec.europa.eu>
Date: Tue, 18 Aug 2026 at 14:08
Subject: Access request accepted
To: <Accredited Verifier email address>

This email is part of an automatic notification process related to your EU-ACCESS account.

Your access request [337559a9-a344-4162-ab1b-06e1fbdba064] for application `CBAM Registry` (CBAM-TC-APP) has been accepted by an administrator user. For the next steps, please review the onboarding manual
available at this location: https://taxation-customs.ec.europa.eu/document/download/9361fade-6f19-4799-b2ef-f6a4ff681af2_en.

 Below is a summary of the access request information:
 - Application: CBAM Registry
 - Domain: Carbon Border Adjustment Mechanism
 - Subdomain: Accredited Entities
 - Type of Person: Legal Person
 - Name: Belgium Bureau Veritas Testing company
 - Type of Actor: Accredited Entity Operator
 - Type of Identifier: Organisation ID
 - Identifier: BEQRPAB12345B01
 - Business Profiles:
    * Accredited Entity - Admin User

 - Attributes:
    * Accreditation Country Code = BE
    * Accreditation Number = BEACE01
    * Company Address = Rue Principale 1, Zaventem
    * Company Email = email address
    * Company Identifier = BEQRPAB12345B01
    * Company ISO-2 Country Code = BE

```

Figure 14: EU Access Registration – O3CI Access Request Approval Notifications

- If in the access request you requested also rights to delegate access to your employees (via the comments inside the "Justification" field, as explained above in Table 10) and your access request was approved, then you should get one additional email notification. This notification will inform you about the rights granted to you for accessing the "EU Access Admin-Ext" tool. ACEO can

delegate access to the Accredited Entity employees (ACEEMPL) via the process described in a separate procedure presented on the CBAM Website.

Figure 15: EU Access Registration – Delegation Rights Approval Notification

- If the access request is rejected, you will receive an email notification containing a justification reason for the rejection. Please review the feedback and restart the registration process.

- If you do not receive an email notification after a few days, please be sure to check your spam folder, as the message may have ended up there.

3.4 STEP-BY-STEP GUIDANCE FOR SUBMITTING A REGISTRATION REQUEST IN O3CI PORTAL

Once the user logs in to the Operators of Third Countries Installations Portal as an accredited entity, the Homepage is displayed. The homepage provides access to several sections through two navigation methods: widgets and a left sidebar menu. Both allow users to jump directly to the corresponding forms.

To complete the registration process as an Accredited Verifier after the access is granted in the Operators of Third Countries Installations Portal, please submit a registration request following the steps described below.

For more in-depth details on the functioning of the Operators of Third Country Installations Portal, please check the CBAM Registry website – User Manual for the Accredited Verifiers and Operators of Third Country Installations portal).

3.4.1 O3CI Verifier Registration request – step 1

When user logs in to the CBAM Registry – O3CI portal for the first time the "Homepage" is displayed as the default page. The user selects the "Accredited Entity Information" option.

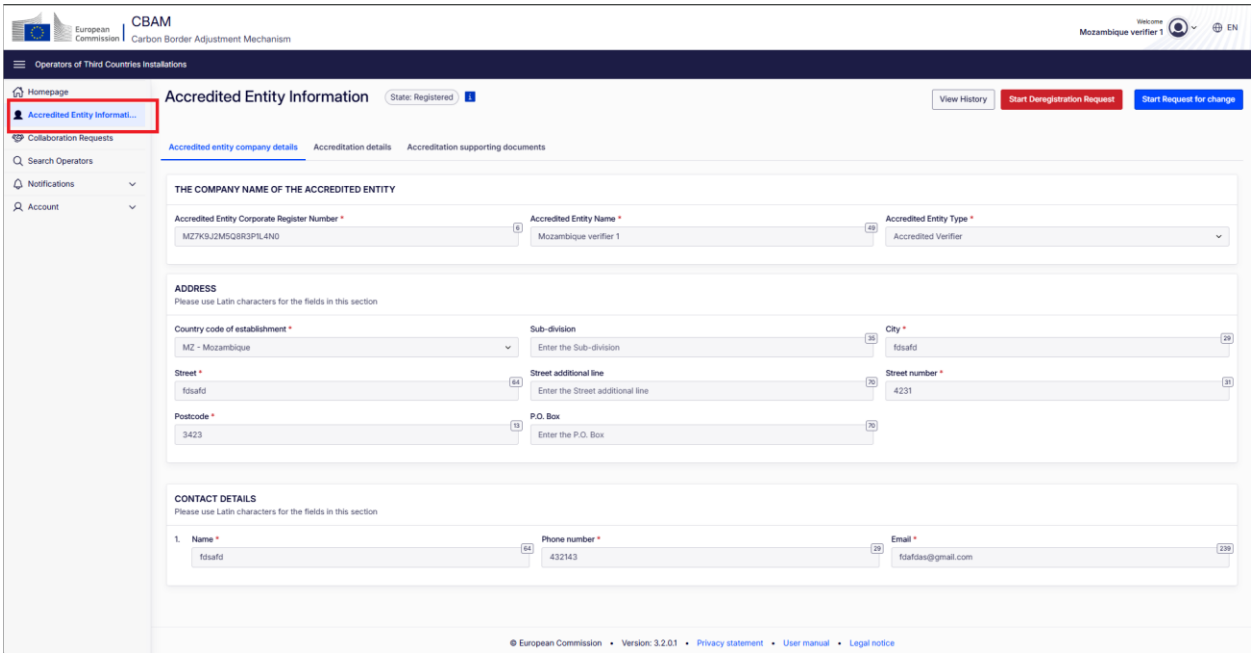

Figure 16: O3CI Verifier registration request – Step 1

3.4.2 O3CI Verifier Registration request – step 2

On the top of the Accredited Entity Information page the State contains the value "New" and on the right hand side the option "Start Registration Request" is displayed.

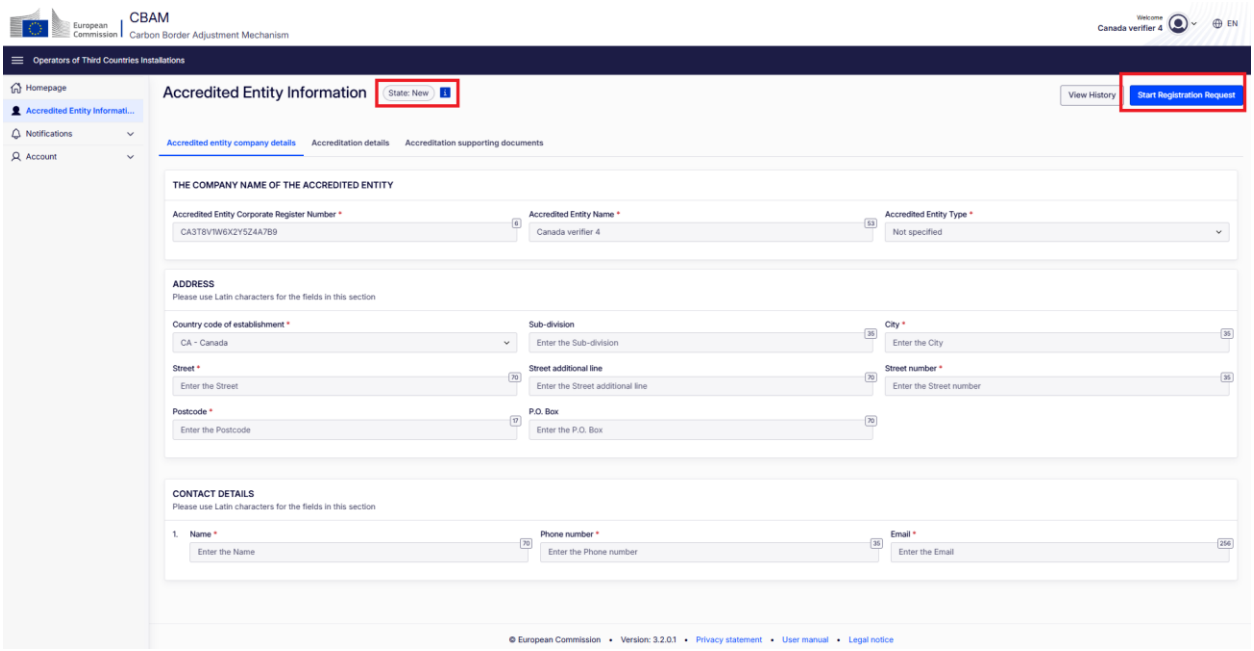

Figure 17: O3CI Verifier registration request – Step 2

Additionally, the View History button is displayed on the left of Start registration Request button, that keeps records of the actions taken during the registration of the accredited entity.

3.4.3 O3CI Verifier Registration request – step 3

The accredited entity user having the Admin user permissions clicks on the “Start Registration Request” button. User can start entering the Accredited Entity information. “The Start Registration Request” button is hidden and, in its place, the following buttons are displayed: “Close and Resume Later”, “Delete Request”, “Submit Request”. The “View History” button remains available.

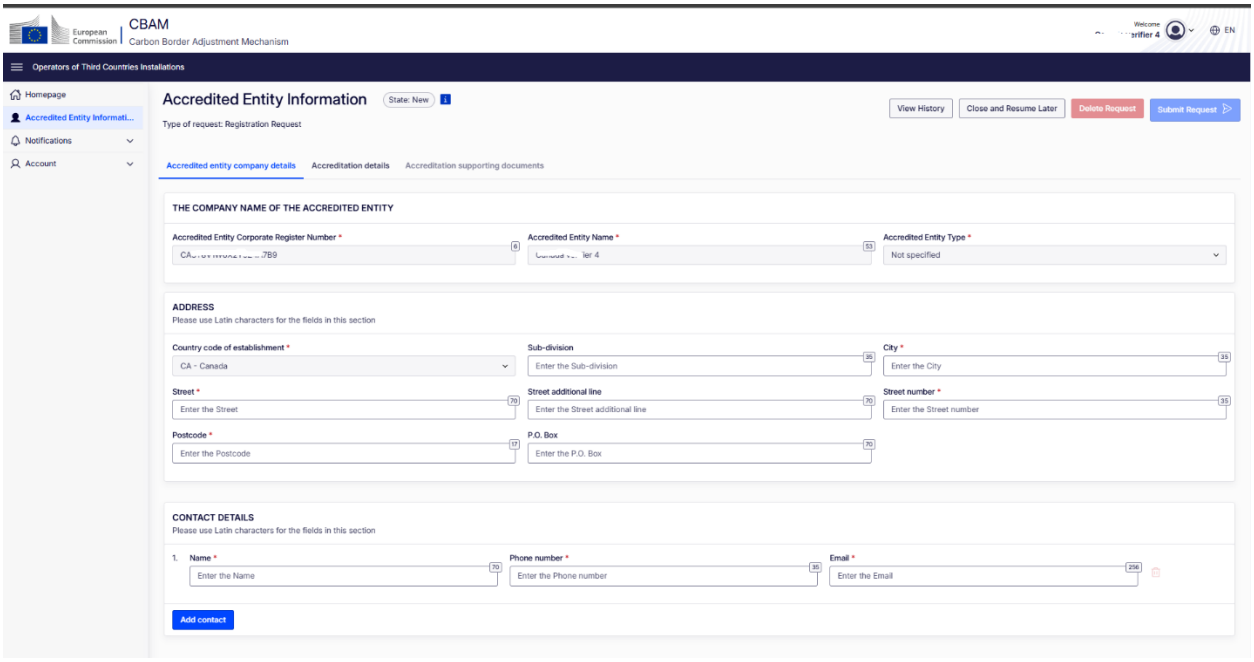

Figure 18: O3CI Verifier registration request – Step 3

The user can now start entering information regarding the accredited entity company details. As also can be seen from the above screenshot, the user can close and resume later from the respective "Close and Resume later" button.

The "Delete Request" and "Submit Request" buttons are still disabled and will be enabled once information is starting to be entered and the request starts to be forming by entering that information.

The type of request contains the value "Registration Request".

3.4.4 O3CI Verifier Registration request – step 4

User enters the details of the company, Address, Contact details in the "Accredited entity company details" tab.

When user fills in all the mandatory fields in the "Accredited entity company details" tab, the button "Save" at the bottom of the page is still deactivated. This happens because there is still information to be filled in the Accreditation details tab.

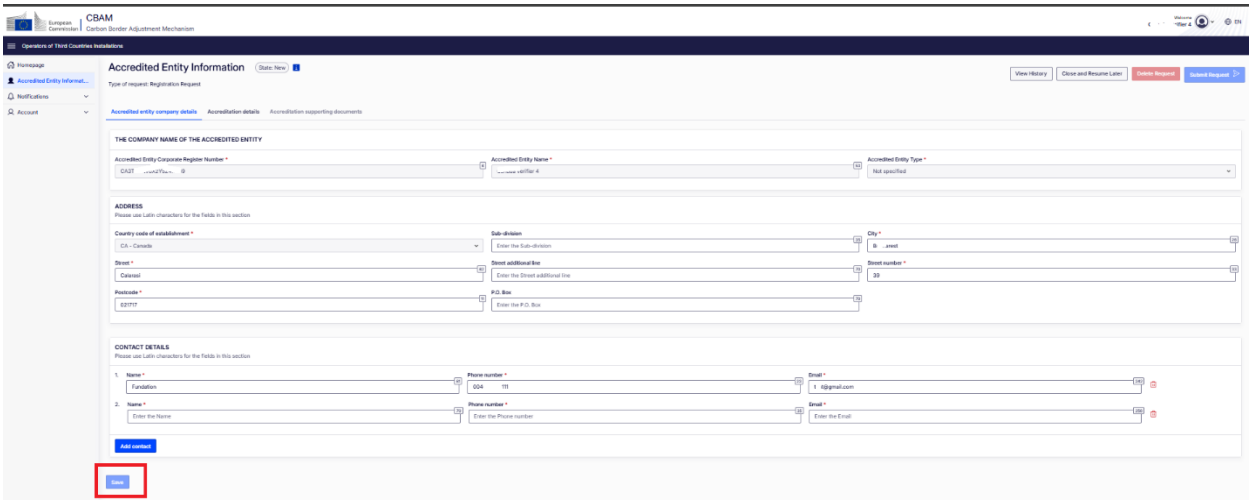

Figure 19: O3CI Verifier registration request – Step 4

3.4.5 O3CI Verifier Registration request – step 5

After all the necessary information has been completed in the "Accredited entity company details" tab, the user can proceed with the information in the Accreditation details tab.

Once all the necessary information has been completed, then the save button becomes enabled, thus letting the user save the updates made so far.

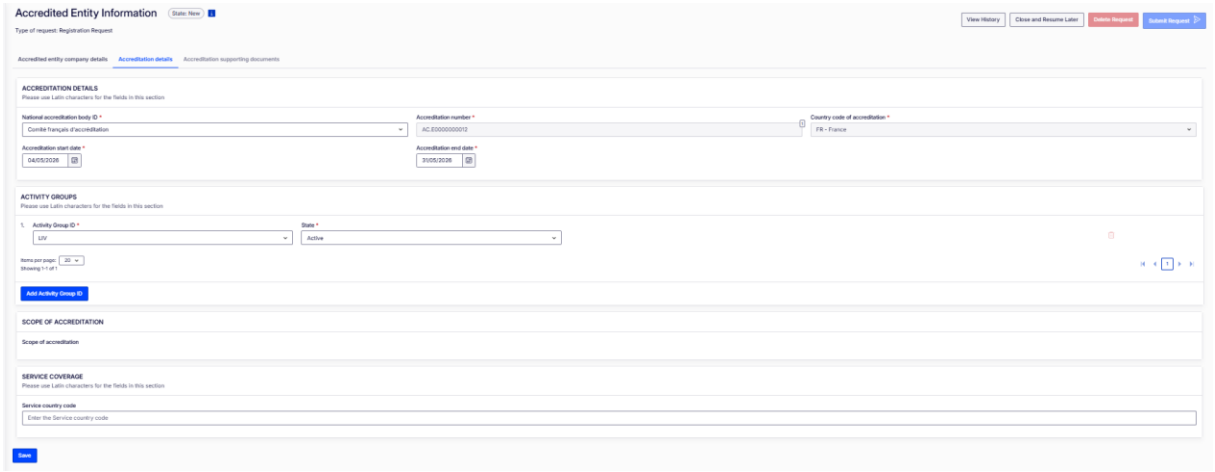

Figure 20: O3CI Verifier registration request – Step 5

Although both tabs (Accredited entity company details and Accreditation details tabs) have been filled in with information, still the "Accreditation supporting documents" tab is disabled and most importantly the "Submit request" button is disabled.

To proceed with the submission of the request* the "Accreditation supporting documents" tab is imperative to be filled-in as well. To proceed with the "Accreditation supporting documents" tab first the user needs to press the save button that is now enabled.

Note *(*): Only Admin users can submit a registration request. Simple user can only fill-in the details across the three tabs: "Accredited entity company details", "Accreditation details", "Accreditation supporting documents" and save the request.*

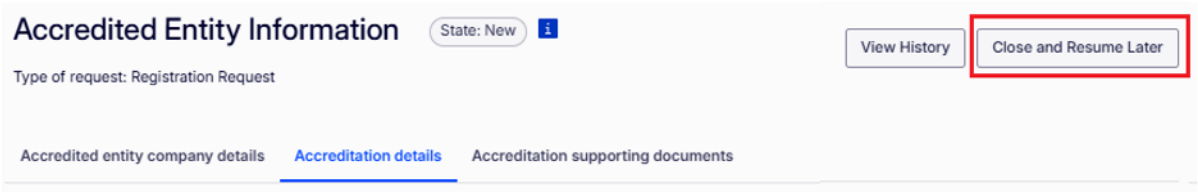

Figure 21: Simple user available actions

3.4.6 O3CI Verifier Registration request – step 6

Now it's time for the Admin User to submit the registration request, as all the information has been entered.

Once the Admin User logs in to the application, the available actions are the "View History" and "Continue Registration Request".

Figure 22: Admin User available actions

3.4.7 O3CI Verifier Registration request – step 7

After admin user clicks on the "Continue Registration Request" button the actions available to the user are "View History", "Close and Resume Later", "Delete Request" and "Submit request".

Once the Accredited Entity Company Details, Accreditation Details tabs requested information has been filled-in and Accreditation supporting documents have been uploaded, an information text will be displayed in the top right corner of the application indicating the user that the upload has been completed successfully or unsuccessfully respectively.

For the uploaded document the user has the option to either edit, download or delete the document.

Now that all the necessary information has been provided from the user, the "Submit request" button is enabled, thus allowing the user to submit the registration request.

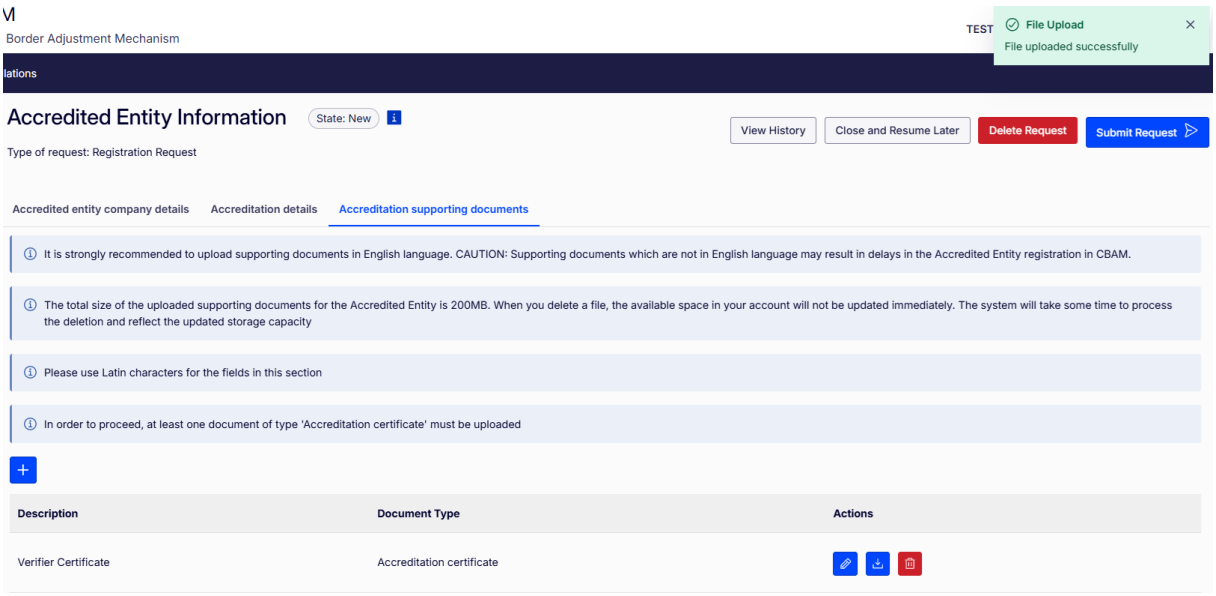

Figure 23: O3CI Verifier registration request – Step 7

3.4.8 O3CI Verifier Registration request – step 8

User now clicks the "Submit Request" button, a submit request pop up notification message is displayed informing the user about the request that is going to be sent.

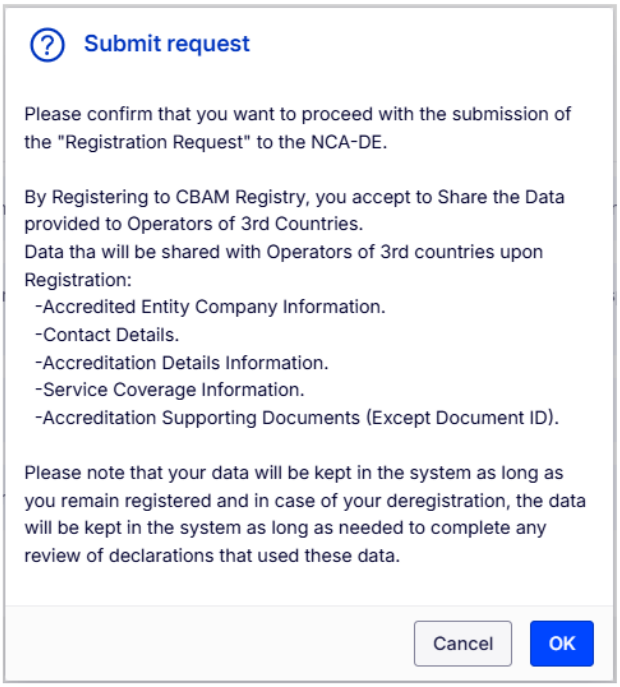

Figure 24: Verification message displayed upon user attempt to submit request

User at this point has the option to click “Cancel” button and cancel the submission procedure. Data entered so far is saved and user will be able to proceed again to the submission of the request at another moment in time.

Alternatively, the user can proceed with submitting the request by pressing the “OK” button.

3.4.9 O3CI Verifier Registration request – step 9

User is notified via a confirmation message that the registration request was sent.

The State is set with value: “Registration requested”. A request ID is formed regarding the specific request.

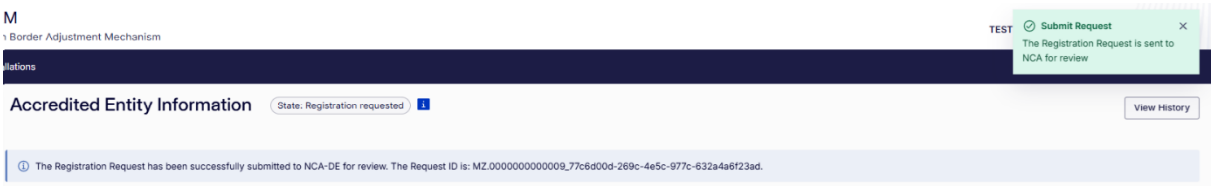

Figure 25: Admin user submits registration request – request sent

4. USER RESPONSIBILITIES AND SECURITY REQUIREMENTS

To ensure the security of the O3CI Portal, all users, including Accredited Entity (ACEO) and their delegated employees (ACEEMPL), must adhere to specific responsibilities and security requirements. The European Commission invests significant time and resources in implementing effective controls to mitigate risks and vulnerabilities. However, the security of information also relies on the care exercised by users in their day-to-day roles.

4.1 USER RESPONSIBILITIES

O3CI Administrator has specific tasks and responsibilities within the O3CI Portal. These responsibilities include managing their accounts, installations, and user delegations efficiently. The key tasks and responsibilities of O3CI Administrator are as follows:

- **Request for Registration**: Accredited Entities can submit a request for registration to the National Competent Authority of the country where the National Accreditation Body has accredited the respective verifier. Verifier will send details of their company, accreditation scope and accreditation certificate, making this information available to the National Competent Authorities.
- **Delegation of Users**: Accredited Entity Administrator can delegate access rights to the CBAM Registry - O3CI Portal for their employees without requiring additional approvals.

The Accredited Entity Administrator is obliged to provide true and valid information in their access requests and submissions.

By fulfilling these tasks and responsibilities, Accredited Entity Administrator gains access to the O3CI Portal where they submit information to the National Competent Authorities. Only the National Competent Authorities are solely responsible for the verification of information submitted by the Accredited Verifiers during the Registration process.

4.2 USER SECURITY REQUIREMENTS AND RESPONSIBILITIES

To prioritise information security and ensure compliance with regulatory standards, users must adhere to the following security requirements:

- Data protection rules of GDPR [R01] and IDPR [R02] are applicable to the O3CI Portal;
- Under the O3CI Portal regulation [R03], all information in O3CI Portal shall be covered by the obligation of professional secrecy (art 13 § 1[2]);
- Users must follow the principles of least privilege, need to know, need to use.

In addition to the password requirements[3] enforced by EU Login, every user plays a vital role in safeguarding their access. To further enhance information security, each user must:

---

[2] All information acquired by the competent Authority or the Commission in the course of performing their duties which is by its nature confidential, or which is provided on a confidential basis shall be covered by the obligation of professional secrecy. Such information shall not be disclosed by the competent Authority or the Commission without the express prior permission of the person or Authority that provided it or by virtue of Union or national law.

[3] As set out in the EU Login Tutorial

- Utilize a strong password and regularly update it (e.g., every 90 days);
- Never share their password with anyone or allow others to use their account;
- Avoid writing down or storing passwords electronically, such as in files or emails;
- Refrain from using the same password for personal or other business-related accounts;
- Avoid displaying any information containing access credentials, such as login names and passwords;
- Notify the appropriate authorities of any changes in their role or access requirements;
- Use Multi-Factor Authentication (MFA) wherever applicable;
- Notify if the account has been leaked or compromised and immediately change the password.

Finally, the use of a Password Manager application is strongly recommended.

4.3 COMPLIANCE

Compliance with CBAM security requirements described in this document (*4.2 User Security Requirements and Responsibilities*) is mandatory for all individuals accessing the O3CI Portal. Any non-compliance or violation of these requirements shall be reported, investigated, and appropriate actions shall be taken. Regular audits and reviews shall be conducted to assess adherence to this document and the effectiveness of user access controls internally by O3CIs.

4.4 DATA PROTECTION AND LEGAL NOTICE

The O3CI Portal will function according to the following data protection and legal notice notes:

- Data protection notice
- Legal notice.

5. HELPDESK AND USER ACCESS MANAGEMENT SUPPORT

Verifiers may encounter access management issues or difficulties attempting to access the CBAM O3CI Portal.

In such cases, it is important to ensure an efficient resolution by accurately categorizing and communicating the nature of the user access management issues or requests.

In the event of any issues, Accredited Entities should send an email to the address: customs-support@itsmtaxud.europa.eu for support.

The official language of communication when reaching out to the email address is English.

The working hours of the support desk is 07:00 – 21:00 CET/Europe-Belgium time-zone, Monday to Friday.

The following information should be included in the email with to the helpdesk request to facilitate effective troubleshooting:

- URL in Use: The specific URL where the issue is occurring;
- Screenshot of the Error: An attachment of a screenshot reflecting the error message displayed;
- Timestamp of the Error: The date and time when the issue occurred.

6. FURTHER GUIDANCE ON THE USE OF THE O3CI PORTAL TO MANAGE YOUR REGISTRATION AS ACCREDITED VERIFIER

Once the Accredited Entity has requested access to the CBAM Third Country Operators portal (CBAM O3CI Portal) and the access request has been approved by the European Commission, as presented in the previous chapters, the next step is to access the CBAM O3CI Portal.

The CBAM O3CI Portal is available at the address https://cbam.ec.europa.eu/o3cinstallation.

To be further guided on how to use the portal, please consult the CBAM Registry – User manual for the O3CI Portal, available on the CBAM Registry website.
